FedRAMP Sr Program Analyst - Performance Profile

Role Summary

As a Sr FedRAMP Program Analyst, you will identify opportunity spaces within TTS/FedRAMP that impact the organization and/or experience of commercial cloud service providers and federal agencies interacting with the program. You will develop best practices and establish frameworks that positively influence our culture and create transparency and equity in our program-related processes. The work is at a scale that will often require contributions from peers who will support your vision, which aligns to the goals & objectives of TTS and FedRAMP. Your work will require thorough documentation that's easily accessible, and when appropriate, is presented to project stakeholders. Success in this role requires strong communication, organizational & policy knowledge, and an aptitude for relationship building - especially within TTS leaders and external partners including commercial cloud service providers and other federal agencies.

Key Objectives

Objective #1: You will develop FedRAMP-related resources, policies, and best practices that impact external stakeholders.
  ● Be a champion for the organization's vision and support commercial cloud service provider and agency experience with FedRAMP
  ● Support development opportunities aimed at commercial cloud service providers and government agencies to support the continued growth of the FedRAMP Marketplace
  ● Develop new FedRAMP-related resources that are focused on large-scale impact

Objective #2: You will establish trusting strategic relationships with the FedRAMP stakeholders and develop a deep understanding of program-related resources, policies, and best practices that impact their team members.
  ● Embody the spirit of customer experience and genuinely engage with all members of TTS and FedRAMP
  ● Maintain consistent lines of communication with leaders, guilds, and affinity groups to understand the risks and challenges facing stakeholders
  ● Work with partners to establish best practices and processes that support small business initiatives and needs

Objective #3: You will have and maintain relevant technical knowledge to support program operations.
  ● Have an understanding of modern IT systems to include structure and functionally of cloud computing service models
  ● Maintain an understanding of current FedRAMP policy and processes as they pertain to assessment and continuous monitoring of commercial cloud services
